Summary of EMWMF and EMDF water management 07 29 21.docx

These figures might work, unless you have something better.

**Subject:** high level summary of water management at EMWMF and (proposed for) EMDF

Carl,

The RA is keen to communicate the differences between how water is managed at the EMWMF and the proposed water management approach for EMDF. He wants to make a distinction between stormwater, contact water (i.e. contaminated stormwater) and leachate. This is a high level summary without the details of sampling regimes. Due mid morning tomorrow.

Would you please review my summary and edit, as needed. Keeping it short is fairly important. Also, let's add a figure. I will look to see what I can find. If you could do this early tomorrow, we should meet our "before noon" deadline.

Many thanks!
